

## Your privacy matters. Help to combat COVID-19 safely and securely.

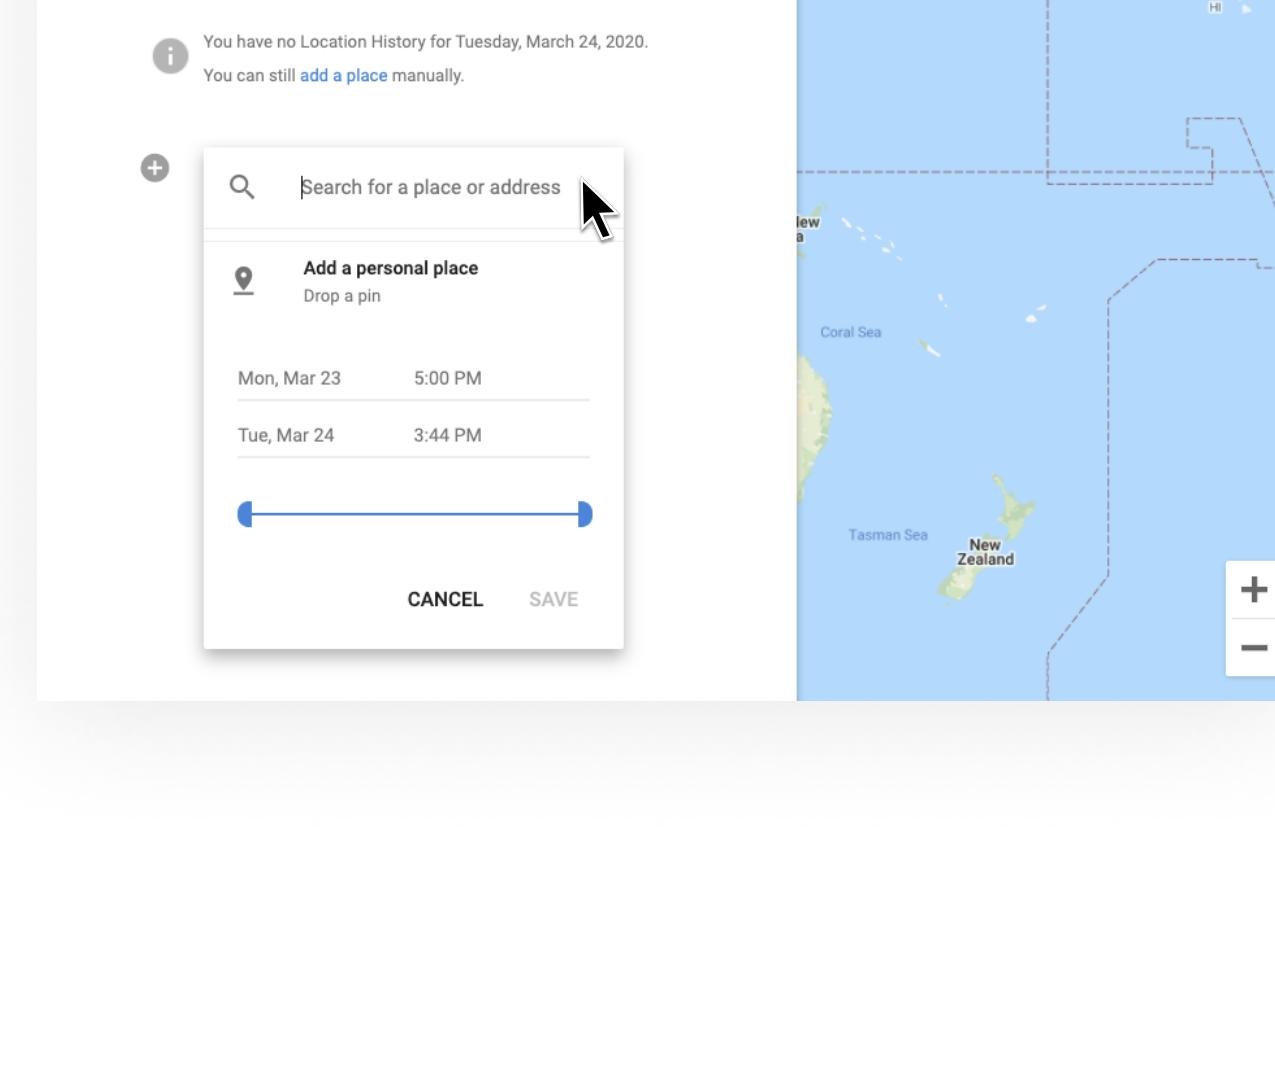

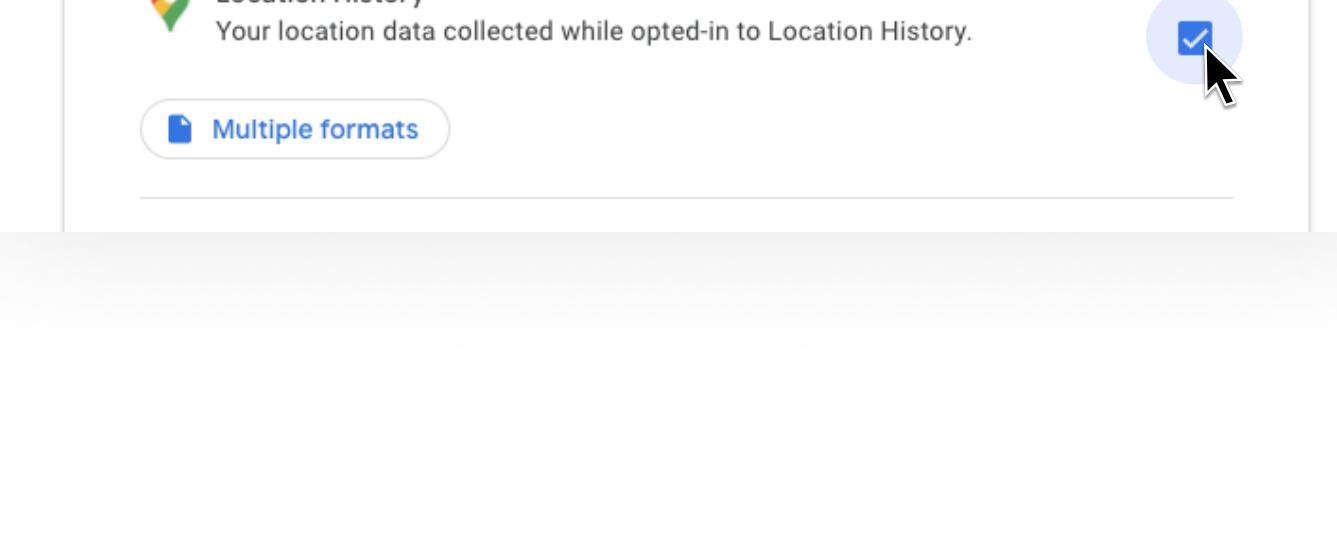

Privately share your location history and compare it with other anonymous users.

I want to help

## How it works

### Find your “Location History”

Using [Google Takeout](#), find your “**Location History**” and export your file. If you don’t have any location history saved here, you can upload your data manually.

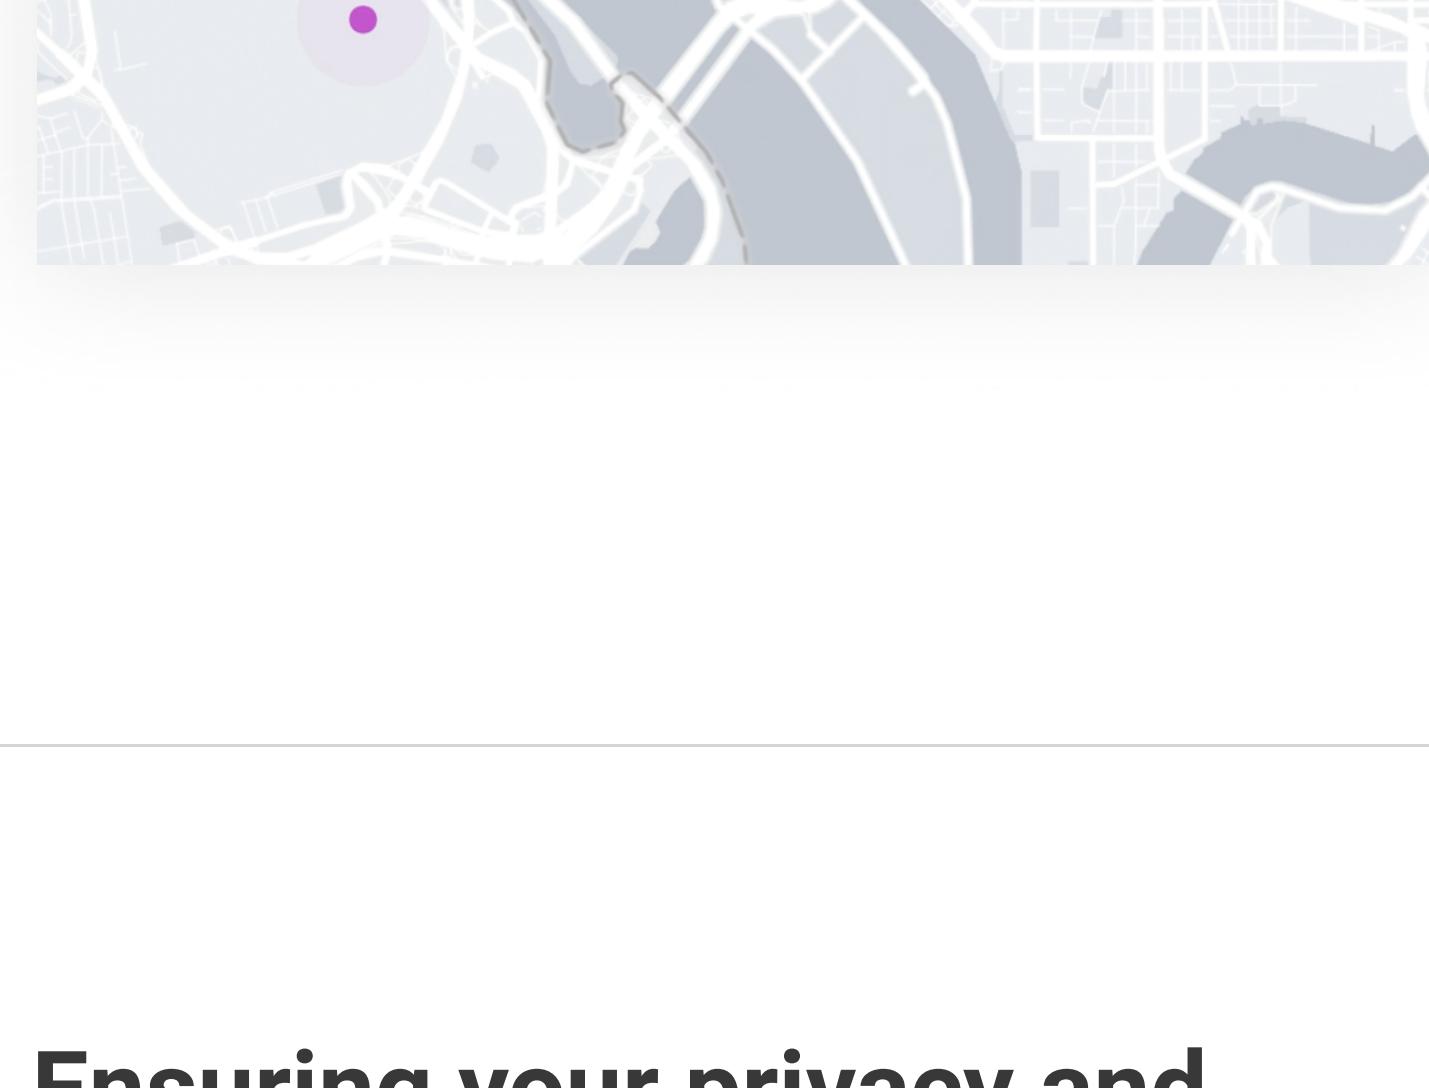

### Upload your data manually

If your location history is turned off, you can upload your history manually to Google Takeout using their [Timeline](#). Select a point in time on the upper left hand corner and manually enter your previous locations by date.

### Export your JSON file and upload to X

Download your “**Location History**” from [Google Takeout](#), unzip the file and upload the JSON file to X.

### View your results ✨

Your results are shown on our interactive map. All data is private and anonymous.

## Ensuring your privacy and protection

The technology behind how their data is secure. If your location history is turned off, you can upload your history manually to Google Takeout using their [Timeline](#). Just select a point in time on the upper left hand corner and manually enter your previous locations by date.

## Let's get started.

I don't have my location history data

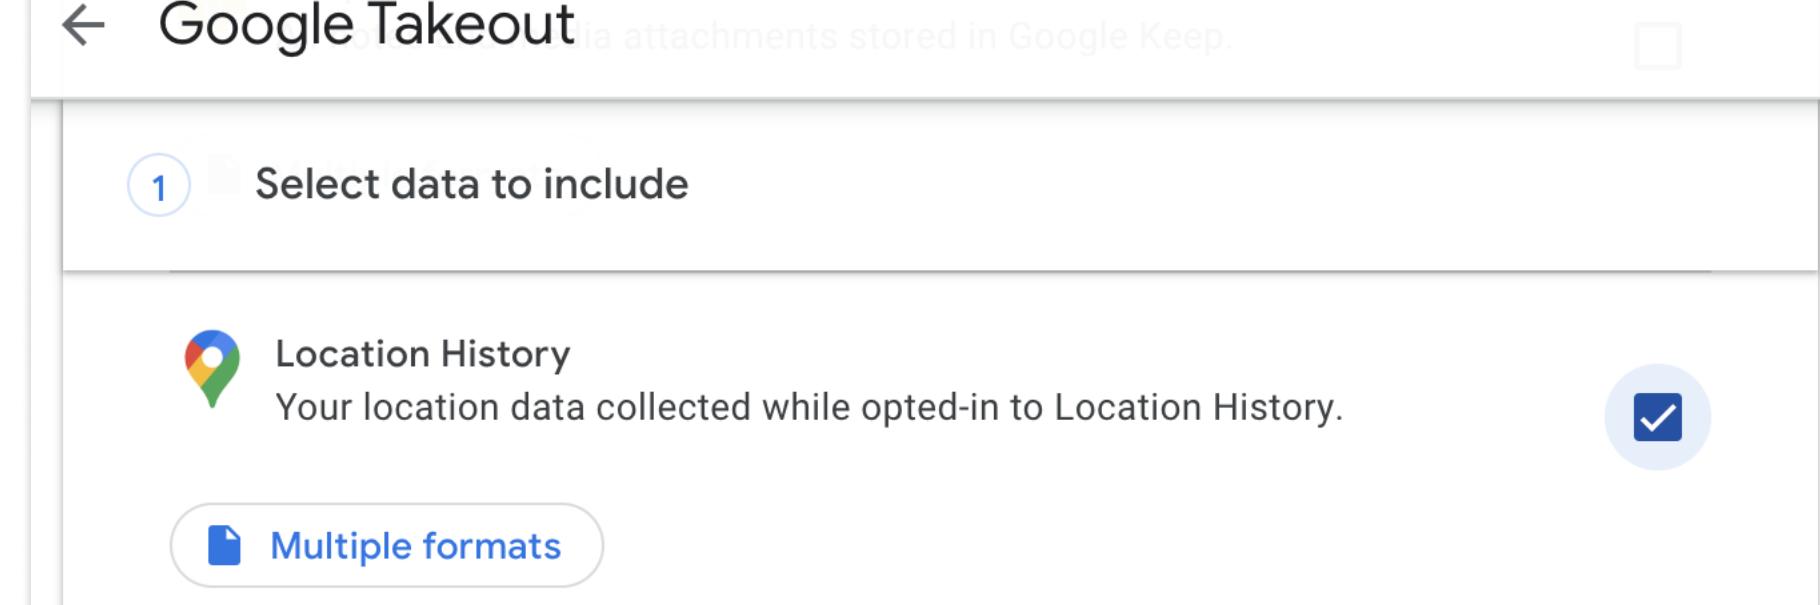

I already have my location data

Your data and privacy are secure. [Learn More](#)

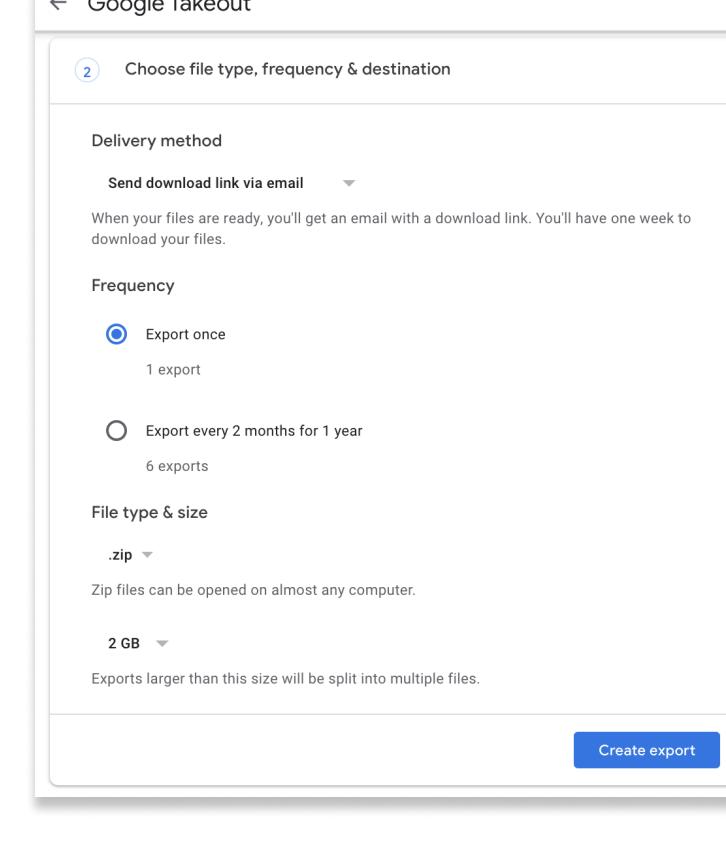

## Step 1

Download your Location History from [Google Takeout](#).

## Step 2

Select "export once", set file type to .zip, and leave the other options as they are.

### Create Account

Lorem ipsum dolor sit amet,  
consectetur elit sed do eiusmod

### Use Google Takeout for data

Lorem ipsum dolor sit amet,  
consectetur elit sed do eiusmod

### Export JSON and upload to X

Lorem ipsum dolor sit amet,  
consectetur elit sed do eiusmod

## Step 3

When you receive your Takeout order from Google, unzip the file and locate your most recent month of Location History. **Takeout > Location History > Semantic Location History > 2020 > 2020\_MARCH.json**  
[Can't find the file?](#)

Upload file

What is your most recent COVID-19 test result? Remember, this data will not be shared in plaintext with **anyone**.

Present

Not Present

Not Tested
